TD-20 BRAIN

Sound Module

The TD-20 Percussion Sound Module represents a giant leap forward in V-Drums technology. This flagship module boasts incredible sound quality, all-new sounds and unsurpassed expressiveness. The COSM modelling-based V-Editing is also enhanced, giving drummers impressive new cymbal control, adjustable snare drum buzz and kick-beater selection. Factor in a new digital output and an expansion slot for future upgrades and the TD-20 is simply the best percussion sound module Roland has ever made.

THE LOWDOWN: SELECTED SPEC

- More than 500 new sounds, improved dynamics and sensitivity, plus CompactFlash storage and V-LINK*
- All-new V-Editing includes modelled snare buzz, kick-beater selection and greater cymbal customising – size, 'sizzle', mic positions
